

DD Tarp XL - SPEC SHEET

Ideal for small groups or single hammocks

100 % Waterproof

Windproof

Versatile

Compact

At a generous 4.5m x 3m, the DD Tarp XL provides ample storm shelter for small groups and solo campers alike. Its 19 reinforced attachment points allow you to set it up in countless different formations - and its uses extend well beyond hammock cover!

Durable and hugely versatile

Take the DD Tarp XL on the trail to shelter you and your team on rest stops, use it to cover two hammocks side-by-side - or simply have it all to yourself! Cook underneath it on your wild camp, use it as a ground sheet, cover your touring bike or kayak with it, craft it into a tipi-tent... We'll let your imagination complete the list.

SIZE:
4.5m x 3m

PACKED SIZE:
26cm x 17cm x 4cm

WEIGHT:
1020g (tarp only)

COLOURS:
Olive green
Coyote brown
MC

WHAT IS INCLUDED:

- Tarp
- 4 pegs and guy lines in a bag
- Stuff Sack

FEATURES:

19 tough reinforced attachment points: 16 around the sides and corners, and 3 along the centre (ridge line). The central seam is taped and fully waterproof. All side attachment points have reinforced PVC patches and are incredibly strong.

MATERIAL:

190T polyester with PU 3000mm waterproof coating

USES:

Great as a day shelter for small teams, to cover a couple of hammocks at once, or to provide cooking or living shelter on backpacking trips. You can also set it up on the ground as a tarp tent or bivi.

DD Tarp XL set-up options:

A-Frame

The tarp can be hung from a rope (ridge line) between two trees using the central attachment points on top.

Once the centre line is in place, the 4 corners can be pegged out using the guy ropes and then additional side points pegged out if required.

Lean-to

Great for day shelter or for a few people sleeping on the ground.

Various lean-to shelter styles can be created by pegging one side of the tarp down to the ground, and using the rest of the attachment points to increase the height or the amount of roof cover.

Useful if you are on the move, the lean-to shelter can be set up in minutes and provides a great shelter for lunch or rest stops.

Ground/Bivi Shelter

Great for day shelter or for a few people sleeping on the ground.

Ground or Bivi set-ups allow you to sleep under the tarp on the ground.

These styles of shelters can be achieved without trees. Using a hiking pole or strong sticks to support, the rest can be pegged to the ground or to posts as needed.

With the large number of attachment points it is easy to adjust these setups to suit the weather conditions and number of people.

Tarp-tent

There are many tarp tent set-ups possible using the DD Tarp XL.

Now we're getting into tarp origami! This looks fairly complex but in fact is easy to achieve - a hiking pole or a stick with padding on top is ideal to support the tarp from inside, and the rest is pegged to the ground.
